Dear Josh:

Do you have any pyrimidine-requiring mutants of *E. coli* you could send me? I would like both K₁₂ and other strains and especially prefer one of B if you have it.

Also, can you make high titered lysates of lambda from K₁₂ and indicator strain, and if so, how do you do it? I would like to start some stuff on lysogenicity this year and would appreciate a slant of K₁₂ and the indicator suitable for the purpose.

I shall be talking at the Enzyme Institute on October 1, and hope to see you then.

With best regards, I remain

Sincerely yours,

Seymour S. Cohen
